HELLO Mountain Home!

While visible construction activity may appear to slow during the colder months, important work continues at the WECRD Aquatic Center behind the scenes. Crews are completing painting, sealing, punch list items, and required inspections to keep the project moving forward. As we look ahead, estimates for the next phase will be gathered to support budgeting, planning, and the development of a clear path forward.

The Recreation Foundation for Elmore County (RFEC) remains committed to securing additional grant funding to help complete the remaining phases of the construction project. The Foundation recently received a generous $200,000 contribution from Leslie and Stephen Goddard. RFEC President Betty Ashcraft noted that the Goddards have been dedicated supporters of the Foundation for many years, consistently demonstrating their commitment to the project's success.

Our board meets on the fourth Wednesday of each month at 6 PM. Meeting dates and times are posted on our website and Facebook page, and community members are always encouraged to attend.

The Aquatic Center is becoming a reality, and your support means everything as this exciting project continues to move forward. Thank you for believing in our community and supporting this important project!
